### **AIR THE WAY YOU WANT**

FIBERTEC

#### CradleVent<sup>®</sup>

**Product** 

Type of project: Certification: The CradleVent® ventilati-

on duct is Cradle to Cradle Certified™ at BRONZE level. Time frame: May 2012 – April 2019

## KE Fibertec AS was founded in 1996 and is by now the world's

bution systems based on fibre technology. The principle is to create draught-free and uniform distribution of the ventilation air through our tailored textile ducts. With the CradleVent® ventilation duct KE Fibertec is the first company in the Textile Based Ventilation business to present a sustainable Cradle to Cradle certified™ product. And this shall only be the beginning, with the

largest manufacturer of textile ducting. KE Fibertec AS develops, manufactures, and markets "Good indoor climate" or air distri-

implementation of the Cradle to Cradle® design concept KE Fibertec wants to increasingly integrate sustainability in the general company strategy. CradleVent® is a ventilation duct that can be used for air distribution in offices, schools, laboratories, and other buildings. When the system is to be replaced, KE Fibertec AS will take it back for recycling and make sure that as much as possible of the product is recyc-

#### safe use as technical nutrients.

**Biological Nutrient:** 

led and used in a new production.

All parts of this product are made for a

#### phase the ventilation can be washed, assembled and disassem-bled quickly.
